

The background of the slide features a close-up of a woman's face with a blue tint. Overlaid on her face are various biometric and digital elements: a white circle with a crosshair is centered on her right eye, and a network of white dots connected by thin lines is scattered across her face and hair. The overall aesthetic is futuristic and high-tech.

**Security Meets Convenience**

## BACKGROUND

---

A long and successful history of delivering leading-edge technology

Founded at SRI/ Samsung Ventures

Hold over 37 patents across multiple categories including software, hardware, algorithms and applications

Agile USA based product and software development team- 17 people

Based in Hamilton, NJ.  
Subsidiary in Dubai

Hey Siri

Princeton Identity Proprietary Information

## EVOLUTION OF IDENTITY VERIFICATION

Princeton Identity Leading the Advancement of Human Identity Methods  
Identifying humans has become more secure, reliable, and more seamless

### PIN / Username / Password

**Security** Lowest

- Security Card
- swapping
- PIN / Password Sharing Cannot truly identify the person

### Usability

- Requires entering data or presenting card
- Memorization of PW / PINs
- PW / PIN expirations
- Complicated PW standards Replacing Lost/Stolen cards

### Mobile Credentials

**Security**

- More secure than pins and Passwords.
- Not easily shared. Added security layer beyond cards-location and 2-factor can be enabled

### Usability

- Limited device contact Close proximity to the reader
- Contactless 2 step process

Biometrics with mobile phone has increased from 27% in 2019 to in 2022 over 55% of users

### Finger / Palm / Face

**Security**

- Probability of failure 1 out of 1,000 Moderately secure

Face recognition 1-4% failure depending on solution

### Usability

- May require contact
- Difficult to use

### Iris

**Security**

- Most secure
- Probability of failure 1 out of 1.4 Billion

### Usability

- Contactless
- On-the-Move
- High speed & capture volume

# MARKET OPPORTUNITY

## Growth in Global Biometrics

**\$82B by 2027**

CAGR 20% from  
24.1B in 2020

Source: Biometric Market Reports,  
Biometric update, October 2020

## Growth of Identity and Access Management (IAM) Market

**\$24.1B by 2025**

CAGR 14.4% from  
12.3B in 2020

Source: Biometric update, October  
2020

## Growth of Biometric Devices for Access Control

**\$12.8B by 2025**

CAGR 8.2% from  
8.6B in 2020

## Problem / Misconception

Current state of Identity management solutions is flawed

- **Added security layers**
  - *Multiple apps/Cards/Passwords*
- **Low/No Security**
  - *Easy to hack/Spoof*
- **Enrollment Nightmare**
  - *Cumbersome enrollment process in hybrid environment*
- **Return on Investment (ROI)**
  - *Constantly changing technology*
  - *Easy to Install/implement*
  - *Integrate with existing ACS*

*Demand for Automation, Security and Convenience*

## Why Princeton Identity?

---

Uniquely Meets Highest level of Security without sacrificing Convenience.....

### SPEED

**Proven Biometric Security solution**

---

Rapid ON-THE-MOVE authentication; focused on **Privacy compliance**

---

**High Throughput**

### SECURITY

**Single Device for ALL access**

---

Iris and face authentication  
Mobile credentials

---

**Extremely Accurate**

\*Residence Hall / Badge checking

### SIMPLICITY

**Unique Seamless Enrollment**

---

Users can enroll and verify without assistance

---

**Effortless Enrollment Process**

# Princeton Identity 2024

The background of the slide features a woman's face with a blue digital overlay. The overlay consists of a network of white lines connecting various circular nodes, with a magnifying glass effect over her right eye. The Princeton Identity logo is positioned in the top left corner, and the text 'THANK YOU!' is centered in a large white font. Contact information for Westin R. Wolfenden is located in the bottom left corner.
