

Partnership- Powering Safer Campuses

- Over 25 years of collaboration
- Integration and Standards
 - OSDP
 - High Assurance
 - Mobile
 - Fargo Connect
 - Key, credential management

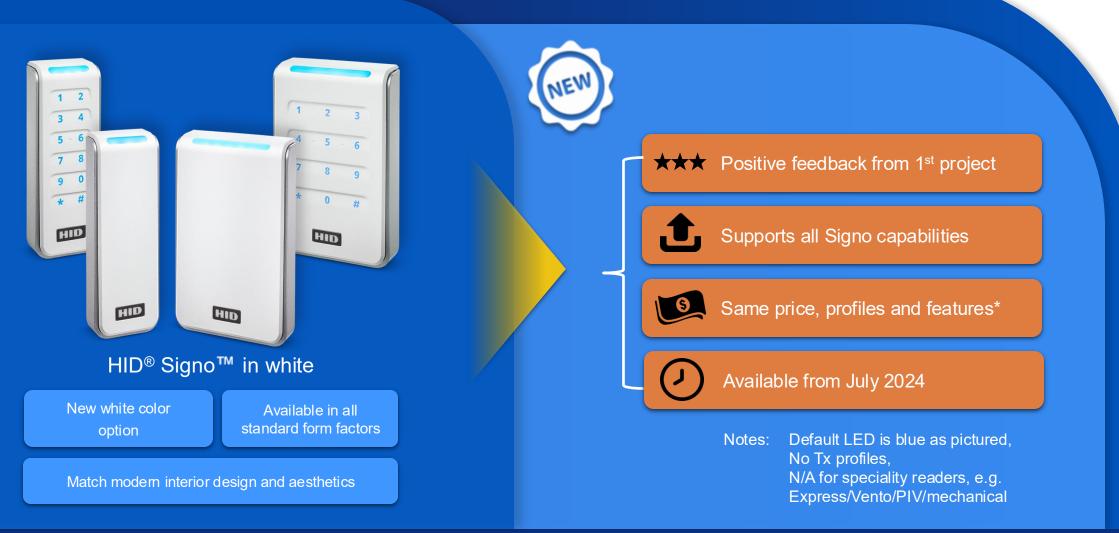

Readers: HID[®] Signo[™]— white color option

Readers: HID[®] Signo[™]— Mechanical Keypad

HID[®] Signo[™] Mechanical Keypad

Reliable performance in cold and wet weather

Allows for gloved-hand and differently able use-cases

Delivers where there's a preference for traditional mechanical key operation

Biometrics – Facial Reader

3.5" (shown) and 7" models

HID® Amico

Ideal for mid-sized organizations

Feature-rich

Fast, accurate facial recognition for secure, seamless access

Precision facial recognition with anti-spoofing protection

Minimized false rejections and delays

– critical for high-traffic areas

Biometric data saved on user's credential (mobile or card)

Announced at ISC West! 2025

- Seamless integration into existing and new systems (API)
- Supports OSDP and Wiegand

Tools & Connectivity

Field Tools

HID Linq On Prem & Cloud

- PC based Device Management software for HID
- Supports HID Signo (except Signo 25B)
- Available in On Prem and Cloud versions
- Allows technicians to manage and configure multiple HID Signo readers over USB or via Mercury controllers
- Powered by HID Origo: Technician Authorizations

HID Reader Manager

- BLE/NFC 1:1 Secure Device Management app on Apple and Android devices
- (Note: 50% faster upgrade using Android and NFC channel)
- For iCLASS SE reader with/without BLE module
- HID Reader Manager will become HID Ling Mobile

Signo Wired Connectivity for fleet management

• For customers with Signo and Mercury LP/MP boards

• For customers with Signo and Non-Mercury controllers

Connect Signo Readers Over USB

- Tabletop 'Pre-commissioning'
- Use HID Linq to upgrade/configure Signo readers over USB
- Linq will need internet connectivity for configuration and firmware files

- 1-4 reader stand
- Easy to use "click" connector on the back
- Readers can be powered over USB using USB HUB (not included)
- P/N SIGNO-STAND-4
- Available now

Connect Signo Readers Over Mercury LP/MP for Fleet Management

Mercury Controller with OSDP connection to Signo

- For customers with Signo and Mercury LP/MP* boards looking for remote device management
- Use Linq to upgrade/configure Signo readers over network (software requires internet access)
- Linq will share same connection to panel as PACS head end

Supported Mercury Controllers & IO Modules

Intelligent Controllers

- LP & MP Models:1501, 1502, 2500, 4502,
- PW7K1ICR2, PRO42ICR2

Serial Input/Output Modules

- MR50-S3, MR52-S3, MR52-S3B, MR62e
- PW7K1R2, PRO42R2
- To work with HID Linq reference the minimum FW required in the Linq User Guides

TCP/IP

Open Supervised Device Protocol (OSDP)

*NOTE: MP Signo firmware update Support targeting Q3 2025

Physical Identities

Multi-technology Support

- For customers who need specific blend of technologies, HID continues to lead market with array of super capable options
- Latest DESFire EV3 combined with iCLASS and Prox (launched).
- FIDO (logical access) with Seos and DESFire (physical access) coming soon!

Eco-Friendly Credentials

- For customers who want to limit the environmental impact of their access control cards.
- Bamboo construction Seos cards available with optional dynamic marking
- Seos technology-based paper credentials released April 2025
- PVC Free plastic blend in development!

Digitized Card Services

- For customers who want easy web-based management of keysets, formats and card designs.
- The HID Origo Management Portal will help centralize your need for both physical and mobile credentials.
- New functionality coming to HID Origo in 2025!

Mercury
Security

MP Provides:

Increased Security

Security by Default!

- TLS 1.3
- AES-256
- Secure Boot & Trust Zone
- Data at Rest Encryption
- 802.1x
- **OSDP Secure Channel**
- Segmented & Protected Container for Apps

Secure Boot & Trust Zone

Ensure firmware comes from known source and applications contexts are isolated

Latest Cryptography

Latest secure crypto methodologies

Updated Firmware

Powered by Mercury's new MercOS 2.x

MP Provides:

Product Continuity

Designed for resilience, flexibility, and longevity!

- Modular components that can be dynamically updated to address future supply chain challenges.
- Increased processing power and memory ensure the platform can adapt to evolving technology.

New Integrated Circuit

Designs contain new integrated circuits with 10-year longevity programs

Multiple Build Options

Expanded real-time build options provided by multiple component configurations

Rapid Firmware Updates

Enabled by in-house managed Linux-based operating system

MP Provides:

App Environment

Tech Partners, OEMs, Integrators & End Users can now write Embedded Apps that live on the MP Controller at the edge to add more integrations, more processing capabilities, and analytics.

Below are some examples of Apps:

Fully encrypted (End-to-End) communication is readily available with Mercury and HID using standard, proven, and accepted encryption methods.

TLS 1.3

AES-256

AES-128 OSDP (Secure Channel)

Mercury Based Host System

MP Intelligent Controller

Series 3

SIO **Module** Signo

Card Reader Seos

Credential

Security

Apps on Controllers

Mercury and its system and technology partners will write apps that run on the controller that both runs business logic to enhance access control processing and enables the interface to more sensors, devices and systems.

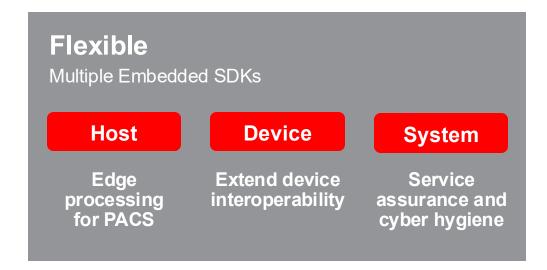

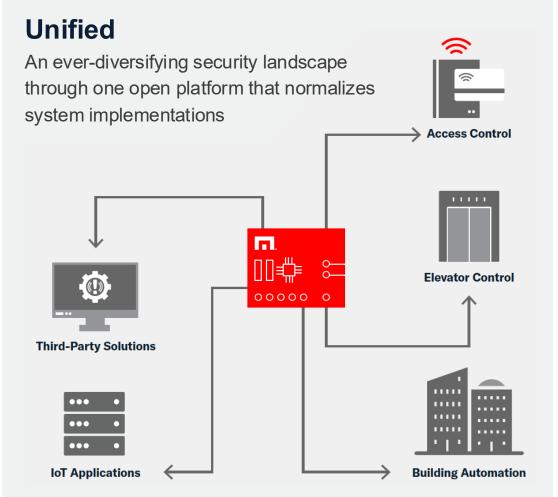

Why APPS are the Future – Product

Scalable Ready for anything — today and tomorrow Interoperability Compatibility Simplicity

Why APPS are the Future – Partner Value

- OFM Partner Benefits
- Do more with less
- Easier consumption of 3rd party devices
- Adds value to the PACS: more data, insights, revenue
- Access to additional channel and market opportunities

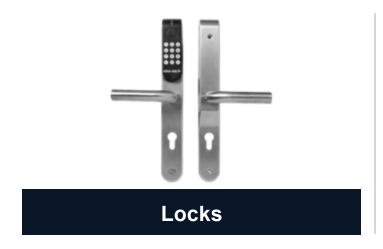

- Access to Mercury platform/brand
- Single integration with 25+ OEMs
- Own the development
- Enhance the features
- Access to additional channel and revenue opportunities

- Drives "openness" message to the device ecosystem
- Extends infrastructure investment
- Flexible solutions evolving with market and customer needs

Target App Functionality

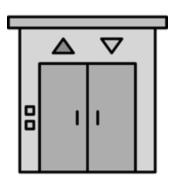

System Monitoring

Embedded Authentication

Intrusion

Elevator Integration

Analytics and Al

) Mercury Security

Showcased Apps at ISC West

KS210 Lock

Solves:

Data center rack access & traceability

Features & USPs:

- OEM integration via Mercury API
- OSDP Input & Output Support
- Up to 4 OSDP multi-dropped buses
- Up to 32 devices supported
- License restricted

Locks

HID pivCLASS

Solves:

 HID Signo reader management

Features & USPs:

- PKI authentication at the door
- FIPS 140-3 FICAM
- MercOS 2.x & MP4502
- Support for Signo Contact
- FICAM GSA APL
- BAA/TAA compliant

Embedded Authentication

Service Assurance & Cyber Hygiene

Solves:

IT management of 10,000 IoT devices

Features & USPs:

- Discovery of devices on network
- Secure connection status for IP & periphery
- Certificate management
- Password rotation
- Firmware update

System Monitoring

Digital Migration with Mobile
